

On Saturday March 17th the Beachcombers

Yvette Cota, Mia Cruz, Shiela Flores, Yuriko Pena, Rhianna Rubio and Monica Yepes meet in the early morning sun with other advocates for Heal the Bay ready to serve. Not only did we make an effort to clean up our beach and ocean, but we learned in the process.

To our surprise, Heal the Bay asked us to document each item of trash we found on the beach. This is a resource that they use to know what they are up against. Working together, we helped pick up about 250lbs of trash. The most common item being a cigarette bud.

This experience has help us to be more aware of

the trash in our local community, because ALL drains lead to the Ocean. So gratefully for HarBro for giving us the opportunity to serve, learn and grow. Thank you
